

HEADALOFT™

HEADALOFT Product Description

HEADALOFT is a patented, innovative solution for adults and children who lack head control. Made of high-quality, durable fabric, **HEADALOFT** comfortably and gently holds the head upright in a versatile, non-restrictive manner. Suitable for all seating and mobility devices equipped with a head rest, **HEADALOFT** is the ultimate head support add-on solution. It is easy to install, can be transferred quickly between wheelchair and car seat or any other type of seat that has a headrest to which the **HEADALOFT** can be attached.

HEADALOFT Benefits:

- Improves body symmetry
- Increases ease of breathing
- Promotes easier feeding and swallowing
- Enhances communication and social engagement
- Enables eye gaze control and increased interaction with others
- Provides ergonomic neck support
- Allows for quality napping while in the wheelchair, stroller or car seat
- Prevents neck pressure sores

Medical experts, caregivers, therapists, and parents agree that HEADALOFT has significantly improved not only the health and well-being of their patients or children, but has also resulted in a higher quality of life, increased social interaction, and more independence.

HEADALOFT is going to change the way we treat head control issues with many of our patients.”

**Director, Pediatric
Rehabilitation Hospital**

“The intake of food and drink, as well as the swallowing became easier and less stressful.”

Physical Therapist

“Not only can the children control their power wheelchairs more safely, it’s easier for them to socially engage with their peers with better eye gaze control.”

Physical Therapist

Technical Specifications

HEADALOFT is made using the highest quality materials. It comes with three sized (S, M, and L) forehead straps to provide anterior support. Soft and comfortable, the product is machine washable and standards-compliant.

box size: 51*15*5
6 units per carton

HEADALOFT Occipital Support

The innovative occipital support cushion is an essential add-on that offers additional support and comfort.

It is easily and quickly installed and is machine washable.

Headovations Headovations was founded in 2014 by Ben Cohen Gazit. Dedicated to providing innovative head support systems, the company's flagship product was designed to protect sleeping children whose heads are most vulnerable during car rides. The idea of protecting people's heads quickly morphed into a mission to provide better head support for all who need it. **HEADALOFT** has been shown to be extremely effective for children and adults with motor disorders, neuromuscular disorders, neurological disorders (e.g. cerebral palsy), and physical injuries.

Alyn Pediatric & Adolescent Rehabilitation Center is Israel's only pediatric and adolescent rehabilitation facility. ALYN treats children with a wide range of congenital and acquired conditions, including cerebral palsy, neuromuscular diseases, spinal cord injuries, brain injuries, burns. ALYN has a reputation for being a leading hospital worldwide in the field of Pediatric Rehabilitation. It has partnered with Headovations, using **HEADALOFT** for many of its patients on a daily basis.
