Safespace

A versatile, soft, durable sleep & relaxation space for anyone who may be unsafe in an ordinary room

The Safespace is designed for those with autism, epilepsy, behaviors which challenge & profound multiple learning difficulties, including those with full mobility. It provides an extremely robust space that can be kicked, punched & head-butted. It can withstand the roughest treatment by both children & adults. It provides a space in which someone can sleep, move, roll or play freely, reducing the risk of injury, not by padding, but by completely eliminating the possibility someone can contact any hard surfaces.

Safespace Voyager and Voyager Compact

Safespace Voyager® & Compact

Who it's for

The Voyager is suitable for respite care or travel for those who are uncomfortable in unfamiliar surroundings or are used to a safe room.

Siesta Family and Safespace Hi-lo

Safespace Siesta®

Who it's for

The Siesta is designed for those who may have a lot of movement and strength, but are unable or disinclined to pull up or climb over the high sides. The customizable design makes it suitable for those with complex or varying nursing needs & those requiring a hoist. Its robust 'flex-out' sides can be kicked, punched, head-butted or rocked against, & help keep a person safe from injuries & from falling against hard surfaces, for example during seizures.

Safespace Siesta® Hi-Lo

Who it's for

For those who require a greater degree of nursing care & the flexibility of a height adjustable platform, the Siesta Hi-Lo provides a comfortable working height for most carers. There are no moving parts or hard surfaces inside the compartment, providing a soft, safer sleeping area.

Safespace® Hi-Lo

Who it's for

For individuals who require the safety of a full enclosure, the Safespace Hi-Lo combines the transfer and nursing height flexibility of the Siesta Hi-lo, with the peace of mind of a full canopy enclosure and zero hard surface interior. Hard surfaces are not padded like other products, the design prevents any contact with hard surfaces whatsoever.

Cosyfit Family

A robust, high-sided sleep area, which can be easily dismantled & stored

Who it's for

The Cosyfit is designed for individuals with limited mobility & is robust enough for adults & children who may rock, thrash about, push or kick. For those with the ability to stand, walk, pull to standing or climb, we usually recommend the Safespace. The Cosyfit also creates a safe environment for those who may otherwise be restricted to a wheelchair. Multiple wall heights available.

A high-sided, height adjustable bed with Trendelenburg option

Who it's for

Designed for those who cannot stand, but who have the strength or capacity to rock, thrash, push or kick & so need safer bed sides. It is used both in the home and in residential and care settings. Available in multiple wall heights.

Who it's for

For those with extremely limited mobility who need support with sitting up & raising themselves, we offer the Cosyfit Hi-Lo (Profiling) option. The backrest & knee break functions, as well as tilting, reverse tilting & height-adjustability, provide support with many aspects of nursing care. 30" wall height suitable only for those who cannot climb over the raised backrest and wall.
