### Photo Specs include:

**Basic Freedom back mounted to the OT Plus back canes. This allows for the Roho cushions to Velcro mount to the board and the OT Plus seat pan.**

**The seat and back combo include (3) 9 cell x 9 cell (16" x 16") Roho high profile cushions. The seat section curves into the backrest. This strategy allows a cushion to be swapped, if needed, with a stock size rather than ordering a 9 wide by 27 long replacement Roho. This nets out to a 14" deep seat that transitions into a 38" tall back.**
