Information on the Jenx® Dreama and SleepSafe® safety bed compatibility

IMPORTANT: Fitting a SleepSafe bed with a Dreama postural support system, requires **TWO QUOTES**

- One quote from Adaptive Imports for the Jenx Dreama
- One quote from SleepSafe Beds for modifications to the Dreama in order to operate with the safety bed.

When ordering the Jenx® Dreama with a new SleepSafe bed: provide Adaptive Imports with the quote number to reference the SleepSafe bed to the Jenx Dreama. The system will ship directly to SleepSafe Beds for installation. SleepSafe will then ship the installed Dreama and the safety bed to the dealer

When ordering the Jenx® Dreama to retrofit to an existing SleepSafe bed: provide Adaptive Imports with the “Parts” quote to reference the SleepSafe “RETRO KIT”. The system will ship directly to SleepSafe Beds for modification. SleepSafe will then ship the “RETRO KIT”, the modified Dreama and instructions to the dealer for installation.

- Any accessories ordered for the Jenx® Dreama will be shipped directly to the DME by Adaptive Imports.
- Only a SleepSafe TWIN size bed, any model, will accommodate the Jenx Dreama.
- All foundations will work. However, a Hi-Lo foundation will make it *easier* to add and remove any postural support accessories by raising the foundation above the side panel.
- In lieu of a SleepSafe mattress, SleepSafe Beds provides a custom deck pad designed for the Jenx Dreama. The pad is secured to the system with an 8-foot black cinch strap.
- The Jenx Dreama is compatible with a padded or non-padded SleepSafe bed.

Please call Adaptive Imports at 877-767-9462 with questions on the Dreama or SleepSafe Beds at 866-852-2337 with questions on safety beds.

Thank you,

The Adaptive Imports team
