

## Hoggi Bingo Evolution Communication Mount Location

The following information is provided to assist with the recommendation and mounting of a communication device system to the Hoggi Bingo Evolution Chassis. This document should be considered background information and should not replace a formal assessment from qualified providers. While mounts may be attached in various locations, due to the folding mechanism, position ④ and ② are recommended. ① may be possible clamping the OVAL tubing. ③ is not recommended due to folding and wheel interference.

The Bingo Evolution tubing locations have been labeled above ①②③④. Looking at the location of the labels in the folded position, you will note the dramatic change in position.

Tubing Size: ②③④= 1" Diameter (25mm) ①=OVAL 1" x 1.75"

The images above shows a Daessy Mount using UFC1000IPMOD Narrow Frame Clamp Inner Piece 1" Round UFC1000IPMOD Narrow Frame Clamp Piece 1" Round with a RFCR.
