

Transform your classroom with a safe and calming sensory space!

Discover the perfect Safespace solution designed to meet the individual needs of your students and accommodate the available space at your school.

Safespaces provide a low-stimulation environment where students can unwind, de-stress, and find quiet time when feeling anxious.

These versatile spaces can be easily adapted to suit high or low-sensory needs, making them ideal for play, therapy, one-to-one and small group activities.

Most importantly, Safespaces offer a safe and comfortable environment, reducing the risk of injury from hard surfaces and elopement.
