Safespace Siesta Hi-Lo:

The Siesta is designed for those who may have a lot of movement and strength, but are unable or disciplined to pull up or climb over the high sides. The fully customizable design makes it suitable for those with complex or varying nursing needs & those requiring a mechanical lift. Its robust "flex-out" sides can be kicked, punched, head-butted or rocked against, & help keep a person safe from injuries & from falling against hard surfaces, for example during seizures. Contact sales@adaptiveimports.com to discuss and review individual specifications.

Suggested HCPCs is E1399
